## **NON-FINAL ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 7-26-07 has been entered.

Claims 1-33 are cancelled.

Claims 34-63 are pending.

### ***Claim Rejections - 35 USC § 112, Second Paragraph***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

1. Claims 58-63 are rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential steps, such omission amounting to a gap between the steps. See MPEP § 2172.01. The omitted step is the step of stirring at a specific temperature.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 1624

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claim 34 is rejected under 35 U.S.C. 102(b) as being inherently anticipated by **Lohray et. al.** (WO 97/41097 or WO'097). On page 89, Lohray et. al. discloses the potassium salt of Glitzone shown below:

The disclosed salt has a melting point of 302°C which is indicative of a crystalline form though the reference reveals no x-ray powder diffraction pattern.

2. Claims 35-57 are rejected under 35 U.S.C. 102(b) as being inherently anticipated by **Chebiyyam et. al.** (WO 00/15638 or WO'638 – cited previously).

Although new claims recite x-ray powder diffraction pattern for Form-I, the potassium salt in Example 39 of WO'638 is presumed to be Form-I because the process in Example 39 of WO'638 is similar to the process in Example 2 of the instant disclosure, which produces Form-I.
